

## Suggested Student Activities

### PRIMARY INDUSTRIES

Teachers delivering this course and workplace supervisors who have hosted their students recommend any of the following activities for students to complete during work placement. This is not a finite list; you may wish to offer other equally suitable activities relevant to the course.

Talking with the students should help reveal the student's levels of confidence and maturity; their current strengths, their preferred competencies to work on and perhaps some areas to improve.

**NB: The activities include degrees of independent work – instruction and supervision must still be provided for the student.**

- Participate in a WH&S site induction
- List the location of supplies of biological and chemical agent; then prepare a plan for managing a leakage or spill
- Safely use chemicals in your routine
- Document a procedure for the use of a chemical on site, the frequency of use, safety precautions, signage, PPE required, safe storage and management of a spill
- Clean and store equipment
- Receive and store products using the protocols appropriate in the workplace
- Practice pest and weed control techniques on plants/crops to ensure they are maintained in a healthy state
- Feed, water, muster and pen livestock as required
- Assist with the preparation of stock for shows/sales
- Check body weight of livestock
- Prepare sites for planting; maintain seedlings from nursery to suitable garden beds
- Assist with harvesting of crops, provide care for harvested crop and assist with transportation where qualified and approved
- Carry out day garden and livestock maintenance as required
- Assist in the maintenance of properties, structures, irrigation, watering systems and fences. Detail the WH&S provisions for the site
- Create a spreadsheet and document the weather, rainfall, temperatures, sunrise & sunset times whilst on work placement at the site. Document and record in what years were the maximum and minimal rainfall ever recorded at the site.
